

# Reservoir Vent/Fill Cap

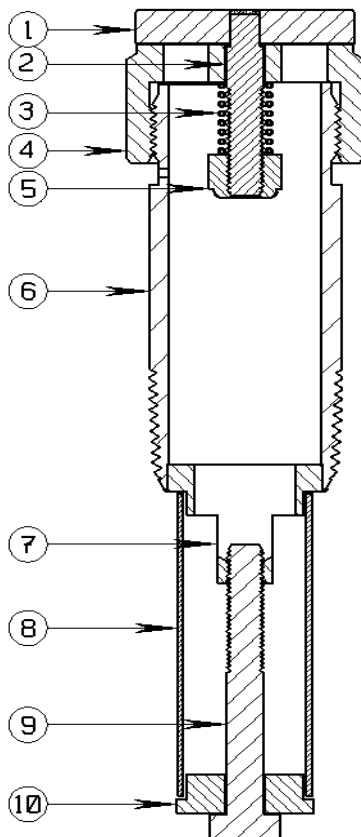

VENT CAP ASSEMBLY, 1" MALE NPT WITH FILTER SCREEN,  
3-5/8" OAL

Model 12RS25

The Sigma 316 stainless steel, pressure relieving Fill Cap prevents pressure accumulation, within a Hydraulic Reservoir (Storage Tank). It will exhaust the gas before pressure accumulation can occur, through the spring loaded cover assembly.

Under normal conditions, the cover prevents rain, dust or other atmospheric contaminants from entering into the Hydraulic Reservoir. The Cable and Bar assembly prevents loss of the Fill Cap during reservoir filling operations.

## PARTS LIST:

1. Vent Cap Top
2. Mounting Stud
3. Spring
4. Vent Cap Cover
5. Nylok Hex Nut
6. Pipe Nipple
7. Filter Sleeve
8. Screen Filter
9. Hex Head Bolt
10. Filter Plug
